Local Miner's Union Supports Memorial Park

At a meeting of the local branch of the UMWA, it was voted unanimously to support the Memorial Park committee in their drive to erect a Cenotaph to those who gave their lives in the two Great Wars. Messrs. Dan Daly and William Smith of the Memorial committee statistics concerning estimated costs and donations already received were given to the Union members. The sum of one dollar per member was asked for and granted. This will be deducted from pay statements and paid to the Memorial Park committee through the Union. While the exact number of members has not been given, the Fund will receive between \$750 and \$800 through this levy.

The transfer of a \$500 War Bond donated by the Coleman branch of the Canadian Legion has been completed. While this donation was listed at \$500, the actual sale of the bond netted \$520. Two other donations, one of \$10 from Mr. and Mrs. Skocz, of New Westminster, and \$1 from Mr. George Lothian, of Coleman, have been received. Mrs. Skocz is the mother of F/O Peter Gandy who was shot down and killed in France shortly after "D" Day. She also asked permission to send shrubs to be planted around the Park and Cenotaph. This request has been very gratefully accepted.

On a basis of \$750 from the Miner's Union, contributions to date total \$2605.25. As the objective was set at \$3,000 there is still \$394.75 yet to be collected.

OVER 6,000 VOLUNTEERS TO AID IN RATION BOOK DISTRIBUTION IN SEPTEMBER

More than six thousand volunteer workers to help distribute Ration Book No. 6 during the week of September 9-16 will be needed by local ration boards in Alberta, it was estimated today by Wartime Prices and Trade Board officials.

There are fifty-three local ration boards in Alberta and they will collectively handle more than 900,000 ration books during distribution week. "It is an enormous task to be accomplished within a short period of time," the prices board official observed, "and for reasons of both economy and speed we have to depend on the help of the volunteers as we did during the war years."

While practically all volunteers who served in former years have again offered their services, there are many opportunities for newcomers to help in this important work. Those who wish to help should offer their services to the nearest local ration board as soon as possible, so that all plans can be completed and everything made ready before the distribution begins on Monday, September 9.

Drinking Water Impure

Water consumers are advised to boil all water required for drinking purposes. The latest water analysis reveals the water to be in an impure condition.

COLEMAN LIGHT & WATER CO., LTD.

FORTY CAR DRIVERS' LICENSES SUSPENDED

Forty drivers' licenses have been suspended in Alberta this year for various causes, according to information received from the provincial secretary's department by the Alberta Motor Association.

During the whole of last year, the number suspended was 68. Provincial legislation provides that magistrates shall have power to suspend driver's licenses when a conviction has been made for violation of the law and such a course appears desirable in the circumstances.

In many of the cases, the drivers had been found guilty of reckless driving or similar infringements of the statute.

The AMA has emphasized the need of observing safe driving principles and create a greater interest in safety education.

Young Coleman Goes Back To School September 3

Although there have been several rumors around town that the school opening will be delayed due to the presence of Polio in Canada, the latest reports received by the Journal show that it will take place on schedule.

Comes Fall, comes school for the youngsters of Coleman. Some eager, some reluctant, but back they must go. It is often referred to by elders as the "good old school days" but for the children and teen agers it is still hard to break away from the old camp grounds, the lake, the farm and all vacation fun.

It will take awhile for them to get back to school work again but once they get settled down it will be like they had never had a vacation fun.

Yes, Tuesday morning will tell the tale. The students will march in promptly at nine and be scrutinized by teachers to see if the holiday has done any damage.

The teaching staff will be much the same as last year with the exception of Mary McIntyre and Winnifred McIntyre who have left. There may be the addition of one new teacher, Peter Bekaji but this is not certain.

MISCELLANEOUS SHOWER

On Thursday, August 22, a miscellaneous shower was held in the IOOF hall in honor of Miss Lillian Ford. About forty guests were present and what and bingo were played. The winners going to Mrs. C. Hayward, Mrs. L. Brown and the consolation prize to Mrs. Beart. A dainty luncheon, was served by the hostesses Katie Kobewka, Elsie Rypien, Mrs. L. Beafore, Mrs. F. Siska, Helen Ziajku and Victoria Horejsi. The guest of honor was presented with many useful and beautiful gifts for which she thanked her many friends in a few well chosen words.

Trail Riding Popular In Canada's National Parks

Modern transportation facilities have brought many of Canada's national parks to within a few days' or hours' travel of large Canadian and American cities. Most people desire to get back to the simple life, to the sound of the brook, to the lake shore and the mountains. The call of the great outdoors is a yearly urge which permeates every office, mine, factory and workshop, and lingers through the night at every household window. There are many different ways in which this annual yearning for life in the open may be satisfied. Trail riding in Canada's national parks is one of them.

For some years Banff and Jasper National Parks in Alberta have been the two principal outfitting points in the Rockies for trail riding expeditions. Trail riding in these parks is internationally established. The sport became so popular that in 1924 the Trail Riders of the Canadian Rockies was formed. It is a Canadian society with cosmopolitan membership. The 23rd annual gathering of this unique organization was held in July of this year in Windy Camp Country, at the junction of Panther and Wigmore Creeks, north of Banff, which is one of the best wildlife areas in the park. Trips to such places as Snow Creek, Harrison Lake, Panther River, the marvellous Red Deer Valley, and Cascade Mountain were feature attractions.

In this park there are nearly a thousand miles of well-kept trails leading to dazzling glaciers, green valleys, bright flowers, glistening brooks, rushing torrents, great dark forests, and jade lakes reflecting white clouds and deep blue skies.

The regions lying between the two parks, and accessible from either, is majestic in alpine interest. Lofly snow-capped mountain peaks, and glaciers which reach down almost to the roadside and melt away in flowered bedded

SOCIAL SERVICE OUTLAY \$3,000,000 IN YEAR BY S.A.

Toronto—Actual outlay on social service operations in the Canadian Territory by The Salvation Army came to nearly \$3,000,000 last year according to the 63rd annual balance sheet just issued. Of this, costs exceeded income by nearly \$1,000,000 and this was met from funds subscribed during the 1944 national Home Front Appeal, according to Colonel Joseph Tyndall, head of The Salvation Army Finance Department.

Actual figures given in the report of outlays coming within the category of social service work total \$2,936,730.93. The net receipts from the 1944 campaign applied to meet the gap between total costs and total income from operations were \$864,500.93, said Col. Tyndall.

Largest individual item in the outlay of funds received from the public, \$410,887.51, was expended as grants-in-aid toward maintenance of more than 300 centres for investigation and relief of problem cases, visitation of the sick and needy and human reclamation work, all this being done by Salvation Army field officers.

Next largest amount, \$270,181.38, went to meet deficits on costs and maintenance of 53 social institutions including children's homes, emergency and rescue homes for girls, maternity hospitals, men's

valleys, lend enchantment to the scene. Mountain sheep, which many people believe are shy, cross and recross one's trail. It is a veritable paradise for the amateur photographer and many a snapshot album is adorned with pictures of wildlife in this great natural museum.

In recent years Yoho and Kootenay National Parks in British Columbia have also become popular areas for this exciting and adventurous pastime. The ardent trail rider may prefer the longer rides, but there are many interesting short rides for beginners. For them, a trip around the Bungalow Camps in Yoho National Park starting from Yoho, Wapta, Lake O'Hara, or from Emerald Lake Chalet, would have a special appeal. For sheer beauty the Yoho Valley is unsurpassed. Takakkaw Falls, more than 1,500 feet in height, The Angel's Stairs, Laughing Falls, Yoho Glacier, or gigantic mountains such as McArthur, Cathedral, Stephen and Vice-President, sometimes called "Guardians of the Valley," provide breath-taking scenes.

Lawe Windermere, in Kootenay National Park, is a good centre in the Upper Columbia Valley for trail riding into the Selkirk or through the western passes of the Canadian Rockies. Riders on the Vermillion Range, upon climbing a ladder to a scaffold look-out platform perched forty feet above tree-trunk level, are able to observe moose, elk and other deer coming down to drink at a mountain spring. The Kootenay River affords good fishing to the rider who did not forget his rod.

Here lies the realization of what one may have mentally pictured as the perfect vacation. The simple charm of trail riding is the sense it gives of intimacy with nature. It is a pleasant, healthful recreation recommended by doctors and extolled by poets, painters and philosophers.

shelters and food depots, hostels for homeless men, homes for aged men and women, relief of distress, police court and prison gate work, support of the League of Mercy which carries on hospital visitation and other welfare activities.

Third largest amount, \$139,862.83 went for rehabilitation work which covered assistance to civilians and domestic science. Judging will be done in the morning, with the doors open to the public from one to seven p.m. Large and small parcels of winning flowers and vegetables will be auctioned off at 7 p.m.

In addition to the show there will be a sports program sponsored by the Bellevue Lions in the morning, while in the evening a dance will be held in the IOOF hall.

For information to exhibitors, it is necessary that they submit their entries on or before 6 p.m. Saturday, August 31. No entries will be received on the morning of the show.

...V...

MISCELLANEOUS SHOWER

A miscellaneous shower was held in the IOOF hall Monday, August 26, in honor of Mrs. Michael Savage. There were about 30 intimate friends present. What was played with honors going to Mrs. H. Garner, Mrs. N. Nicholas and the consolation prize to Mrs. Janotak. A dainty luncheon was served by the hostesses. The honored guest ably thanked her many friends for the lovely gifts presented to her.

MISCELLANEOUS SHOWER

A very lovely shower was held in the IOOF hall Wednesday, August 21 honoring Miss Helen Koruska, bride-elect. Over 100 of her friends attended. What and bingo were played, the honors going to Mrs. Doreen Waveran, Helen Koruska and the consolation prize to Mrs. R. Willets. The guessing contest was won by Mrs. M. Parry. After a very dainty luncheon served by the hostesses, Mrs. Ann Vasek, Pauline Vasek, M. Vrsky, A. O. Melusik, R. Kalinoda, E. Hotalchik, Mary Uno and Misses Tes Koruska, Josie Alampi, and Mary Kovack, the honored guest ably thanked her many friends for the lovely gifts she received.

CARD OF THANKS

I wish to thank all those who attended, sent gifts, or in any way helped to make the shower in my honor such a success. I especially wish to thank the hostesses, Mrs. A. Vasek, Mrs. P. Vasek, Mrs. A. O. Melusik, Mrs. M. Vrsky, Mrs. M. Unolovsk, Mrs. E. Hotalchik, Mrs. L. Kalivoda and Misses Mary Kovack, Josie Alampi, and Tessie Koruska.

HELEN KORUSKA.

Jimmy Slugg Signs With Lethbridge Club

Jimmy Slugg, a local boy, has signed up for the 1946-47 hockey season with the Lethbridge Senior Club, and is to play left wing.

Jimmy was born in Coleman in 1924 and was educated here. He played juvenile hockey in Coleman, then went to Edmonton where he played the 1943-44 and 1944-45 seasons with the junior Edmonton Canadians. He led the junior league's scoring parade and also won the most valuable player award during his last season there.

Last winter he starred with the Kimberley Dynamiters.

Jimmy is known throughout the Pass as a heady, quick, clean player and was popular amongst the fans and especially so with his fellow players.

People throughout the Pass wish him every success in his future career.

CAN YOU SEE?

That's good—and we hope that you will never have to use your finger tips for eyes.

A donation to the Canadian National Institute for the Blind will assist in training persons without sight to be self-sufficient.

Please ask your elevator agent to deduct a generous donation from your grain ticket.

Donations to the Institute are an allowable expense from income for tax purposes.

Help make the day brighter for those who live in darkness.

Thank you!!!

Canadian National Institute for the Blind serving central and southern Alberta. Old Court House Building, Calgary.

Rev. P. Thompson, Financial Secretary.

Mr. Farmer: You will find the above request in poster form in your elevator, and a letter will reach you by mail within the next few days which will make it convenient for you to meet our request. We are hoping for a one hundred per cent response, so as you sell your crop will you please buy sight.

Dominoes Lose First Match Of Provincial Series

The Dalroy Bearcats Defeated The Coleman Dominoes 5 to 3 in The First Game of The Best Two Out of Three Series.

The first match of the Alberta Intermediate "B" Fastball finals played here on Sunday, August 25, was won by the Dalroy Bearcats as four costly errors gave the opposing team five unearned runs, to spoil a brilliant pitching performance by Bill Skura, who limited the opposition to three hits, while fanning eleven batters.

Coleman collected ten hits from Percival but errorless fielding prevented the Dominoes from threatening to overcome the lead assumed by Dalroy in the disastrous fifth inning.

Collings and Skura hit circuit blows for the home team.

In the evening game which, was an exhibition match Coleman again out-hit the Bearcats, this time 10 to 6 and the Dominoes coasted to a 7 to 2 victory.

In this match Skura and Binda hit homers for the winners.

Bill Skura held the Bearcats in check with a brilliant display of pitching while the Dominoes showed improved fielding.

The remaining games of the two-out-of-three series will be completed at Keoma on Sunday, September 1.

The Quality Tea "SILVER ORANGE PEKOE" Canada's Foreign Trade

THE QUESTION OF INCREASING foreign trade is one of the most important matters with which Canada must deal in the post-war years. During the war, it was demonstrated that we have here the necessary requisites for great industrial development. When there was urgent need for war materials, Canadian industry was able to expand greatly to help meet these needs, and this expansion brought about a general speeding up of activity in many of the primary industries, in transportation services, and other factors associated with industrial production. During the war, when labour and material were often in short supply, this expansion was frequently beset with difficulties, but in time of peace, such a development would be of benefit to the entire country.

Faced With A Challenge

Canada's Minister of Trade, Mr. MacKinnon, has drawn attention to the fact that we are now faced with a challenge to seek new markets in addition to those in the United States and Great Britain, which have been for many years the traditional outlets for Canadian goods. The Trade Minister, in a recent address before the Canadian Junior Chamber of Commerce at Edmonton, expressed the view that we can look to Latin America for great expansion in trade. It is apparent that there is a keen interest in those countries in developing trade with Canada and that there is a very large market there for many Canadian products. Mr. MacKinnon and other authorities have also urged that more attention be directed to markets for Canadian goods in the Orient. Japan, once a great exporting nation is not now a competitor for trade in the Pacific, and there should be many opportunities open there.

More Trade With India

Records show that in 1939 exports to Australia, New Zealand, China, India and Japan formed less than ten per cent of Canada's total export trade. During the war, trade with India increased, and there are encouraging possibilities for it to be further built up, since the resources of the two countries are not competitive. There is now also a great potential market for Canadian goods in China. It is apparent that competition for business in the post-war world is keen, but Canada has much to gain by making every effort to secure profitable outlets for her products. In the words of Mr. MacKinnon, "if Canada cannot find markets for her goods at satisfactory prices, we will at once feel the sad consequences here." Developments respecting foreign trade should be watched with interest for they may have a profound effect on Canada's future economy.

Price Control And Rationing Information

Q—Will ration books issued to new-born babies contain coupons to cover infant's rationing?

A—If you apply for a ration book on or before October 31st, the book will contain this year's allotment of sugar-preserves coupons for canning sugar.

Q—Are ex-servicemen given a priority suit purchase certificate? I was told the other day that these priority certificates for suits are no longer issued to ex-servicemen.

A—All ex-servicemen receive priority suit certificates when they are discharged. After October 30, 1946, these certificates will not be issued. However, retailers and merchant tailors will be required to honor the certificates which have been issued until December 31, 1946.

Q—When do the first ration coupons become due in ration book six?

A—Two meat, 2 butter and 3 sugar coupons become due on September 19 and 26, these coupons to be removed from the new ration book No. 6. Anyone not obtaining their ration book at the distributing centre during the regular days set aside for the distribution of ration book six, will have to wait until after September 29 for their book, and will, therefore, find themselves unable to use the above ration coupons on the days they become due.

Q—I am a barber in a small village. May I raise my prices for barbering and hairdressing to meet the higher cost of living?

A—Barbering and hairdressing are under the price ceiling. You may not raise your prices unless you obtain special permission from the Wartime Prices and Trade Board.

Please send your questions or your request for the pamphlet "Consumers' News" or the Blue Book in which you keep track of your ceiling prices, mentioning the name of this paper to the nearest Wartime Prices and Trade Board office in your province.

A MOTOR TRIP

Four Manitoba Residents Travel To Ontario In A Jeep

Travelling 1,300 miles in a jeep is not exactly the most comfortable mode of transportation, but it is a way of getting to your destination and seeing more of the world in the same time. Four residents of Manitoba did that when they travelled from Gypsumville, about 180 miles north of Winnipeg, to St. Catharines in a farm jeep.

The four, Mr. and Mrs. Harold Hunter and Mr. and Mrs. Alky Freeman, came down to attend a funeral. They had planned to go by rail, but missed the train, and struck upon the brilliant idea of making the journey in a jeep. Leaving Gypsumville on Wednesday afternoon, the quartet and their jeep arrived on Saturday morning, none the worse for their long trip.

On the contrary, the journey was rather delightful, with many interesting sights encountered on the way. No trouble was experienced, but they did run out of gas north of North Bay. In all, it was a most interesting journey.—St. Catharines Standard.

KING'S PICTURES

LONDON.—The most important pictures from the King's collection will be shown next winter at Burlington House by the Royal Academy, and will include nearly 500 works.

MARoonED ON ROOF—Missing his mark during an airborne demonstration at the Washington monument grounds in Washington, D.C., Parachutist Michael J. Faynd landed on top of the U.S. navy department building and wonders how he will get down. The jump was made from low altitude during an army show and the limited ground area at the monument caused him to land on the building.

Defies Discovery

Location Of Legendary Silver Mine In Ontario Is Mystery

A silver mine of fabulous wealth is located in a cave somewhere in the Mainline Lake district east of Peterborough, Ontario, according to local legend. Location of the mine, it is believed, is known only to a few Indians in the district.

The legend says that many years ago a man named Meyers came to the wild area around Mainline Lake for his health and there became friendly with the Indians and finally was shown the cave.

The tale told by Meyers was that the silver was found in the cave in formations hanging from the ceiling. Two other white men were supposed to have been presented with silver from the cave by Indians. Today, however, the whereabouts of the legendary mine is a mystery.

NOT MODERN DISCOVERY

The Masali, natives of Central Africa, knew that malaria is carried by mosquitoes long before modern medicine discovered the fact. Their word for malaria, translated literally, means "I have been bitten by a mosquito."

Flights To Moon

Interplanetary Travel Claimed To Be A Possibility

The United States Navy said it's only a hop, skip and a jump until persons will be able to fly to the moon.

But first the Navy has to perfect its jet-propelled, pilotless aircraft. From this research the Navy will learn a lot about the interplanetary system.

"Then, a little farther in the future, are satellite vehicles, circling the earth hundreds of miles up, like moons," a Navy statement said. "Interplanetary travel, in case someone feels the urge to visit far places, is only a short step from the satellite vehicle."

The forecast is contained in a review of the Navy's guided missile program. One of the weapons of this type under development is a pilotless aircraft that is sent into the air to "sniff out" its own enemy target. When it "smells" an enemy plane or ship it drives on it, exploding as it strikes.

This weapon has its water twin. A missile that will "dive deep" and swim unerringly to a fast manoeuvring target is being worked out. It also can be fired against submersibles from a submerged submarine.

A Man To Remember

Australian Doctor Unknown Outside His District Is Being Honored

An Australian doctor, who was practically unknown outside his own district, has achieved fame after death. Residents of Payneham, a suburb of Adelaide, are planning a \$9,720 children's centre as a memorial to Dr. E. L. Borthwick for his 46 years of self-sacrifice for the community.

Examples of his deeds for the needy were: He never charged a poor patient. He thanked a patient for getting better after he had performed free of charge, an operation that saved the patient's life. He had an understanding with a druggist that prescription marked "ad nonum" (to my account) were to be provided free for patients. He instructed the local butcher to send steak daily to poor patients who needed food rather than medicine. He sent loads of firewood to the needy during the winter. For 26 years he attended, free of charge, a man suffering from an incurable ailment. Dr. Borthwick was 75 when he died and to the last he struggled to attend people who were not as ill as he was.—Niagara Falls Review.

WOULD LEAVE REICH

FRANKFURT, Germany.—An "unanimous desire" by millions of Germans to emigrate from the occupied Reich has been reported by the United States army's intelligence division.

A healthy youngster walks and runs about 15 miles a day. 2687

Would Train Nurses

Must Relieve The Present Shortage Across Canada

TORONTO.—The Canadian Nurses Association at its closing session of its convention recommended that immediate steps be taken to train nurses aides to work in hospitals with a view to alleviation of the present acute shortage of nurses across Canada.

The association urged that representative committees be formed for the purpose of studying the problem. Included would be representatives of the nursing and medical professions, hospital administration and hospital associations, and provincial government departments.

The committees would make an analysis of the functions and responsibilities of the professional nurse in order that her energies "may be directed to these duties, and that duties not requiring the services of a professional nurse be directed to other workers."

Because the educational requirements for admission to schools of nursing in Canada vary in the different provinces, and the requirements of some schools do not meet university matriculation standards, the assembly urged that educational credentials of applicants be approved by an authoritative educational body.

SOVIET LIBRARIES

The Soviet Union has 80,000 public libraries in cities and countryside. Of these, 1,581 are in Moscow, including the great Lenin library, leading library of the country, with its collection of 10 million books.

Pep, Corn Flakes, All-Bran, Rice Krispies, Bran Flakes, Krumbles and All-Wheat are all made by Kellogg's, the greatest name in cereals!

Pep Bran Flakes with other parts of Canadian whole wheat are delicious, extra crisp, extra thick. Your whole family will enjoy Kellogg's Pep.

SAVE TIME...SAVE FUEL...SAVE FOOD!

Made Some Changes

But Viscount Montgomery's Coat Of Arms Is Conventional Shield

Field Marshal Montgomery, Chief of the Imperial General Staff, has chosen a conventional shield for his coat of arms, but the supporters reflect his unorthodoxy. One is a crusader—reminiscent of the crusader's badge worn by his famed 8th Army—and the other is a British Tommy in battle dress, wearing a black beret of the type favored by the Field Marshal.

The shield proper shows two lions and lilies in the arms of Montgomery families. The motto, also shared with the other Montgomerys, reads: "Gardez Dieu" (Guard Well).

Established Service

Blood Donation Scheme Has Proved Valuable To British Hospitals

In a review of British blood donation scheme last year the British Ministry of Health states that about four thousand bottles of dried plasma were sent to Holland after the liberation for the medical treatment of people suffering from the effects of starvation. This was in addition to many thousands of bottles of whole blood plasma sent to the British fighting services and used in civilian hospitals in Britain, where transfusion is being used more widely than ever before, especially for surgical and maternity cases. The total number of blood donations in England and Wales last year was nearly 394,000. Before the war, blood transfusion was the concern of a few voluntary associations and one or two local authorities. Now a service designed to meet the needs of wartime casualties has become an established and valuable part of the general hospital services of Britain.—Fort William Times-Journal.

Origin Of Ice Cream

Production Was Started First In Italy In Year 1600

Very little of the history of ice cream has been recorded but its production is said to have originated in Italy as long ago as 1600. Water ices were probably brought to France from that country about 1560 but ice cream was introduced in Paris until 1775. It appeared in England and in Germany about the same time and was advertised in New York in 1786 for sale at a dinner in honor of President Jackson.—Kitchener Record.

GEMS OF THOUGHT

INDIVIDUAL EFFORT

The best way to get to the top is by being the best man at the bottom.—V. H. Jones.

Merit exists without high position, but no one can reach high position without some merit.

—La Rochefoucauld.

Is a musician made by his teacher? He makes himself a musician by practising what he was taught.—Mary Baker Eddy.

Your circumstances may be unenviable, but they shall not long remain so if you but perceive an ideal and strive to reach it. You cannot travel within and stand still without.—James Lane Allen.

Straight from the Mighty Bow this truth is driven:

They fail, and they alone, who have not striven.

—Clarence Unry

The race advances only by the extra achievements of the individual. You are the individual.—Towns.

A psychiatrist says that everyone will be insane by the year 2139. If present conditions of living continue, this estimate may be altogether too liberal.

Drive out ACHES

Sergeant: "Did you sleep well on your cot? I'm afraid it was a little hard and uneven but—"

Conscient: "It was all right, sir. I got up now and then during the night and rested a little, you know."

"I understand married men make the best commercial travellers."

"That's right. Probably because they're so used to taking orders."

Young Bill: Look at your old worn boots and your father a shoemaker. You ought to be ashamed of them.

Young Phil: That's nothing. Your baby brother got only one tooth and your father's a dentist.

The old-fashioned farmer was hard to convince. "No," declared he, "I'll have no such contraptions in my house. Planners are bad things."

"Oh, but father," protested his daughter, "this is an upright piano."

A business man called at a friend's office. After a glance round he asked, "How's your new office boy getting along?"

"Fine; he's got everything so arranged that I can't get along without him!"

A Kentucky judge met an old Negro mummy of his acquaintance. "Good morning, Aunt Jemima," he said, pleasantly. "Where are you going?"

"Laws, Judge," was her reply. "I've been whah I've goin'."

Answer To Last Week's Puzzle

GOVERNMENT IS EXPECTED TO WIND UP SESSION BY END OF THE WEEK

OTTAWA.—The government is expected to drop a number of pieces of legislation now on the order paper of the commons in order to bring a speedy conclusion to this the second session of Canada's 20th parliament, it was learned here.

The government is understood to have definitely decided not to press for concurrence of the report of the joint committee of the senate and the commons established to choose a design for a distinctive Canadian flag.

It was learned that the government also plans to drop until the next session a bill that would provide for the re-establishment of the Canadian information service, government agency established to provide news about Canada to foreign sources.

A third measure expected to be dropped would provide for the establishment of a group of officers to direct the re-establishment of war veterans.

Members generally believe that if the measures are dropped until next year there is every possibility of proroguing the session by next Saturday, a week later than expected.

However, experienced parliamentarians say that they won't venture a guess on a prorogation date in view of the way matters have been developing at the current session.

They point to the fact that three weeks ago there was more urgency among members to wind up the session than there is at present. Now, they say, there appears to be no immediate desire on the part of the majority to get the work over in a hurry.

FELT IN CANADA

Trouble In Middle East Raises War Risk On Shipments

VANCOUVER.—Repercussions of strife in the middle east are being felt in the ports lining the Pacific coast of Canada and the United States.

War risk on cargo from these ports to Palestine have been increased to 3 1/2 cents per \$100 cargo value. The former rate was 20 cents.

Strike and riot risk rates have increased from 1/4 to 1/2 per cent.

Rates to other countries, which, during war years fell within the same range, remain unchanged.

CANADIAN ARMY BASE MAY BE ESTABLISHED AT THE PORT OF CHURCHILL

CHURCHILL, Man.—The huge United States army and air base erected here during the war may become a permanent Canadian army base. This was the information gleaned during a visit to the camp. The Canadian army will carry out a more extensive Muskox expedition next winter and will likely be joined by a force of American soldiers in these operations.

At the present time 100 Canadian soldiers are camped in the almost deserted American huts. No Americans are now here. The Canadian army men are carrying out tests with summer vehicles and one officer told tourists, on the annual Churchill excursion, that some of the vehicles were of the secret type.

A huge tank seemed to be the centre of the most interest. The vehicles under test included an amphibious duck which was used to transport the tourists across the harbor to old fort Prince of Wales.

To the 200 or more American tourists the big camp was a great surprise. Few had ever heard of it and there was great wonderment as to why Uncle Sam had built such an elaborate camp so far away from the American border. Fear of an invasion by Germany through the Hudson Bay was generally accepted by the tourists as the chief reason for the camp.

United States spent huge sums of money on the camp. It is located from three to four miles from the town and was erected on part rock and part muskox land. Hundreds of tons of gravel were hauled in to level up the ground and the air strips built up at least 20 or more feet. The runways are of course hard surfaced. The military camp is about half a mile away from the hangars.

More than 3,000 American soldiers were stationed here but the airfield only had a small number of permanent airplanes based there. Much use was made, however, of the landing field by planes enroute to other bases in the far north.

The camp is electric lighted. A power plant with two dynamos, one developing 500 horsepower and the other 300, is still in operation. A big picture show which would seat over 500 is still intact but no use of it is being made by the Canadian soldiers. Water is also laid on for the men.

BLACK SEA AFFAIRS

Powers Oppose Russian Views On The Dardanelles

WASHINGTON.—In an historic claim to direct interest in Black Sea affairs, the United States expressed its opposition to Russian demands for a share in military control of the Dardanelles.

An American note to Russia, drafted after consultation with Britain—was one of two factors that sent relations between the United States and countries within the Soviet orbit to a post war low.

The other was the United States' protest to Yugoslavia over the "outrageous performance" of Yugoslav fighter planes which attacked and forced an American transport plane to make a crash landing.

Bearing the signature of Dean Acheson, under-secretary of state, the Dardanelles note expressed the firm opinion of this government that Turkey should continue to be primarily responsible for the defence of the straits.

It noted that the Russian proposal contained no reference to the United Nations—a reminder that an international organization has been set up to handle all such problems.

It was made clear that United States would not sit idly by in any Russian effort to establish herself in a favored, if not dominant position in the straits.

"This government cannot... agree with the Soviet view that the establishment of the regime of the straits should come under the competence of the Black Sea powers to the exclusion of other powers."

The note, however, did set its seal of "general agreement" on three of the Soviet proposals, namely:

"1. The straits should be always open to the passage of merchant ships of all countries.

"2. The straits should be always open to the passage of warships of the Black Sea powers.

"3. Passage through the straits for warships not belonging to the Black Sea powers shall not be permitted except in cases specially provided for."

Mr. Acheson handed the note to Fedor Orlov, Russian charge d'affaires in Washington.

Copies were sent to Britain, France, Turkey, Greece, Yugoslavia and Romania who were, along with Japan, signatories to the Montreux convention under which the straits are controlled.

H. G. WELLS

LONDON.—H. G. Wells, distinguished British novelist, scientist, historian and social critic, is dead. He had suffered for many years from diabetes, and recent complications drained his vitality. He would have been 80 on Sept. 21. At 15 a draper's apprentice, he became one of the most famous literary men of his age.

A prolific writer, he turned out more than 70 novels and historical works, which have been translated into every major language of the world.

Mr. Wells married twice, first his cousin, Isabel Mary Wells, and later, after a divorce, Amy Catherine Robbins, one of his students, who died in 1927. There were two sons by his second marriage.

HARD ON BRITAIN

Coal Shortage Means Shivery Winter And Much Unemployment

LONDON.—Mass unemployment in Britain this winter is threatened by a 5,000,000-ton coal shortage.

That big a deficit will put 1,000,000 men and women out of work, Arthur Horner, South Wales miners' president, told a Rhondda valley meeting.

Fuel Minister Shinwell said in the house of commons that only higher individual output by the country's 700,000 miners can lessen the gap.

It may be even wider unless expected savings in industry materialize.

For British households, this will be another shivery winter, the annual allocation for each family continuing at 2,400 pounds. The one bright spot is that there will be no cut.

INDEPENDENT CROP REPORTS INDICATE WESTERN YIELD WILL BE WELL ABOVE AVERAGE

WINNIPEG.—The Winnipeg Free Press and the Winnipeg Tribune said in independent crop reports that while estimates of yield are only tentative, western Canada this year will produce a wheat crop above the 10-year average of 347,000,000 bushels.

The Tribune placed the tentative yield at least 435,000,000 bushels while the Free Press, stressing the uncertainty of estimates before actual harvesting has been completed, said merely the crop should be the best since 1942.

The prairie crop in 1942 totalled about 528,000,000 bushels. In the best year since—1944—it reached about 392,000,000.

The Free Press said: "Seldom has a western crop passed through so many vicissitudes without more substantial damage being in evidence. Moisture reserves over most of the prairies have been below normal all season and the crop was saved from disaster by timely rains. "The effects of the July frosts in

northern sections and the extreme heat in early August will not be fully known until the crop is threshed while yields in drouth areas are spotted and unpredictable. For these reasons the crop is a most variable one."

The Tribune reported: "While it is yet too early to indicate prospective wheat yields in some crop districts with reasonable accuracy, present tentative estimates suggest that the three prairie provinces may harvest a crop of at least 435,000,000 bushels. This would compare favorably with 297,000,000 bushels produced in 1945 and the 10-year average of 347,000,000 bushels. . . .

"No. 2 Northern will be the predominating grade of the 1946 wheat crop (on present indications) with the percentage of No. 3 exceeding the percentage of No. 1 Northern. No. 4 and No. 5 Northern will be common in northern areas which suffered from frost, according to correspondents."

POWERS DEMANDING THAT FREE ELECTIONS MUST BE HELD IN POLAND THIS FALL

LONDON.—The foreign office said that the British government was prepared to apply economic sanctions to Poland if the Warsaw regime failed to carry out the Potsdam agreement for free and unfettered elections in that country this fall.

A foreign office spokesman said Britain would refuse to return Poland's gold reserves, brought here by the wartime exiled government, if election provisions sketched in Anglo-American notes to Warsaw were not observed.

"The first and most obvious sanction, in the event the grave irregu-

larities of the recent referendum also take place during the promised election, would be for us to refuse to ratify the recent economic agreement providing for the return of the Polish gold reserve after deduction of the expenses of the exile government while in London," the spokesman said.

The joint notes from the United States and Great Britain accused the Polish government of ignoring the agreement for free elections in Poland, and charged that grave irregularities occurred in the Polish referendum last month.

TO APPOINT BOARD

British Government Is Arranging For Control Of Steel Industry

LONDON.—The government announced it has decided to appoint a board "for the general control and supervision of the iron and steel industry."

The announcement said the board would include members of the privately-owned steel concerns, but declined to disavow previously announced plans for eventual public ownership of the mills.

The board will be responsible to the minister of supply, John Wilmot, who last April announced in the house of commons that the government had decided to extend a "large measure of control" over the iron and steel industry.

"Nationalization of the industry was one of the Labor party's campaign-announced goals.

HIT MAGNETIC MINE

ROME.—Eight men lost their lives when the British merchant ship Shipjack, whose home port is Newcastle-on-Tyne, England, hit a magnetic mine off the Adriatic port of Ravenna.

PARIS PEACE CONFERENCE SCENES—Summoned by Prime Minister Attlee, the British cabinet in special session is reported to have heard U.S. alternative proposals for Palestine. At the Paris conference, Mr. Attlee, centre, and Australia's Dr. Evatt, right, chat with Indian delegates.

TROOPS TURN HAIFA INTO ARMED CAMP—Palestine's port of Haifa is a "frontline" area as British troops dug trenches, placed barbed wire and sand-bagged pillboxes as it was sealed off from the rest of the world. During a recent intensive search for arms, troops questioned Jewish girls.

As a crisis approached in the Holy Land over the Jewish immigration problem, two more immigrant ships from Europe arrived at Haifa, where some 2,800 refugees living on ships wait to land. Some of the refugees are seen on their ship

NOTES AND COMMENTS

TOURIST TRAFFIC NOW A TRICKLE

When the tourist traffic should be at its peak we find that the traffic which had been in heavy volume in June is now just a mere trickle through the Crows' Nest Pass at the present time.

Direct cause of this drastic decrease is poor roads.

We, in this district, are well aware of the dusty washboard road from Pincher to the Pass and have agitated loud and long for its immediate improvement without success up to the present. Another reason, and one we are not so familiar with, is the atrocious condition of the road from Wardner to Elko in BC.

We received a BC Exchange which recorded a meeting between good road advocates in Fernie and district with the Deputy Minister of Public Works in British Columbia. There was evidently no mincing of words on the part of the good road advocates who cited the loss of tourist traffic from both east and west to that vicinity. However

the Deputy Minister was a good politician for he sympathized with them, told them his department was well aware of the importance of the road as an outlet by the three prairie provinces into BC, twelve months of the year, yet he promised them nothing in the immediate future.

Banff National Park is breaking new records, the same applies to Waterton National Park. It simply means that the reputation of our roads has already been spread among the tourists and we are being given a wide berth.

If the Pass towns in Alberta and British Columbia intend to have modern hard-surfaced highways that will attract the tourist traffic they must bring increased pressure to bear on their respective Public Works departments. Too long now have we been fed on mere promises that are never fulfilled.

Should Blairmore, Bellevue and Hillcrest lend their weight to Coleman's constant agitation, increased pressure could be brought to bear at this end of the Pass.

STRIKES AND LOCKOUTS IN CANADA, MAY, 1946

Time lost due to strikes and lockouts in Canada during the first five months of 1946 was greater by over 600,000 man-days, it was announced today by the Hon. Humphrey Mitchell, minister of labor.

Time lost during May, 1946, accounted for a great part of this increase, being 82 percent of all time lost due to industrial strife during the first five months of this year. This was due mainly to the strike of 37,000 loggers and woodworkers in British Columbia, which began May 15, and is now terminated, work being resumed pending settlement of the dispute.

Strike figures for the first five months of 1946 show 92 strikes, involving 61,866 workers and causing a time loss of 691,108 man-days. For the same period in 1945 there were 83 strikes, with 23,098 workers involved and a time loss of 77,573 man-days.

The figures recorded for May of this year show 35 strikes, involving 47,300 workers with a time loss of 564,925 man-days as against 24 strikes in April 1946, with 6,907 workers involved and a time loss of 47,116 man-days.

At the end of May, 11 strikes were recorded as un terminated.

A comparison between recent figures issued by the British labor ministry and those issued by the Dominion department of labor shows that while unemployment is on the increase in Britain it is diminishing in Canada.

During May, 1946, there were 3,466 more men and women out of work in Britain than there were during the previous month.

Over here in Canada, as at May 2nd, there was a drop of 24,000 unemployed applicants since April 4th. During the same period there was an increase of 25,000 in the number of unfilled vacancies—more than double the gain registered in March.

The employment picture is also considerably brighter in the prairie region. According to Fred J. White, regional superintendent, unemployment insurance commission, there has been a steadily increasing demand for labor ever since the beginning of spring. During the five week period ending April 11, the total number of job opportunities for both men and women rose from 9,750 to 13,337. For a similar period ending May 16, the figures rose to 16,423, and as at June 13, the total had mounted to 18,327.

Another indication of the improved employment picture is reflected in the fact that during May there were fewer new applications for unemployment insurance benefit than there were during April. The total number of persons signing claims register during the last six days of May was 3,706 less than the number during the last six days in April.

The situation in respect to the employment of ex-service personnel is also improving with the number in receipt of out-of-work allowances gradually diminishing. During the month of May, 7,657 veterans were placed in employment. In the same period 1,958 ex-servicemen and 50 ex-servicewomen were reinstated in their pre-war jobs.

ROOSEVELT MEMORIAL UNVEILED AT CAMPOBELLO

At Campobello Island, New Brunswick, where the late President Roosevelt spent many vacations in his early life, and to which he came for his honeymoon, a monument has been unveiled in honor of his memory.

To him Campobello was always the "beloved island" and he continued to visit it whenever possible during his whole lifetime.

His long and happy association with this Canadian beauty spot has now been suitably commemorated as a matter of national importance. The monument, made from New Brunswick granite, stands in front of the public library at Welschopol. Affixed to it is a bronze tablet bearing this inscription:

"In happy memory of Franklin Delano Roosevelt 1882-1945. Statesman and humanitarian, who during the many years of his eventful life, found in this tranquil island, rest, refreshment, and freedom from care. To him it was always the beloved island."

Taking part in the official ceremony were the Honorable J. A. Glen, minister of mines and resources, speaking on behalf of the Government of Canada; Mrs. Eleanor Roosevelt; Honorable Ray Atherton, United States Ambassador to Canada; Honorable D. L. MacLaren, Lieutenant-Governor of New Brunswick, who unveiled the monument; Honorable John B. McNair, premier of New Brunswick; Mr. J. F. Calder, president of the Campobello Board of Trade; and Reverend J. J. Alexander, of Moncton, who conducted the invocation and benediction. Dr. J. Clarence Webster, of Shediac, New Brunswick, chairman of the historic Sites and Monuments Board of Canada, who conceived the idea of such a memorial and was largely responsible for arrangements in connection with the unveiling ceremony, acted as chairman. He read a letter from the Prime Minister of Canada regretting inability to be present.

The official party was conveyed from St. Andrews-by-the-Sea to Welschopol on board the Canadian destroyer H.M.C.S. "Mimac." A detachment of fifty ratings from this destroyer and thirty enlisted men from the U.S.S. "O'Hare" mounted the guard of honor at the monument. The combined guards came to the salute as the monument was unveiled.

A detachment of Royal Canadian Mounted Police escorted Mrs. Roosevelt and members of her family from their summer residence on the island to the memorial site.

A number of local residents, many of them known to the late President and his family, attended this historic event.

WEDDINGS

KRYWOLT-KUBIK

A very pretty wedding took place at St. Anne's Catholic church, Blairmore, on Tuesday morning, August 20, when Margaret, youngest daughter of Mr. and Mrs. J. Kubik sr., of Blairmore, was united in marriage to Mr. Aloise Krywolt of Coleman. Rev. Father M. A. Harrington officiated.

Given in marriage by her father, the bride was adorned in a floor length veil held in place by a bouquet of pink roses and carnations.

Miss Annie Kubik, sister of the bride, acted as bridesmaid and was attired in a gown of pink sheer with chapel veil and carried a bouquet of gladioli.

Mr. John Nimcan attended the groom while Mary Kanik, of Blairmore, and Helen Morris, of Coleman, acted as flower girls. They were dressed in white.

The reception was held in the home of the bride's parents. About fifty invited guests attended.

Upon returning from their honeymoon at the coast, the happy couple will reside in Coleman where the groom is employed.

JONES-FORD

St. Paul's United church was the setting of a very beautiful wedding on Saturday, August 24, at 4:30 p.m. when Lillian, only daughter of Mr. and Mrs. George Ford was united in marriage to Mr. Ronald Jones, of Coleman. Rev. McKelvey, of Blairmore officiated.

The bride was given in marriage

by her father, Mr. G. Ford. She wore a gown of net with satin sweet-heart top and a three-quarter length veil with a heart top. The bride carried red roses and wore a string of pearls, the gift of the groom.

Bridesmaid, Miss Katie Kobowka wore a blue sheer gown and carried a bouquet of carnations and gladioli. The best man was the bride's brother, Norman Ford. The bride's mother wore a pink dress, pink hat with black accessories and a corsage of yellow gladioli. The groom's mother wore a blue dress with white accessories and a corsage of red carnations. Miss Leah Jones, of Blairmore, acted as flower girl.

Mr. Emmerson played the organ and proposed a toast at the reception to which the groom responded.

The reception was held in the Grand Union hotel at 6 p.m. where sixty guests were present.

The happy couple left on their honeymoon to be spent in Calgary and Banff. They will return by way of the Banff-Windermere highway. The bride and groom will reside in Coleman.

NEARLY A MILLION WILL GO TO TOWN

Over 900,000 in Alberta Will Call For Their New Ration Books In September.

When nearly a million people in Alberta go to town during the week of September 9-16, it will not be to the polling booths of a general election, nor to a circus or annual fair. They will be calling for their new ration book No. 6.

Over 900,000 new ration books will be issued in Alberta, approximately half of those in northern Alberta, the Wartime Prices and Trade Board announced.

Specific days during the week of September 9-16 are now being set aside by each ration board in the Alberta region for distribution of the book within their territories. Local papers will carry advertisements showing distribution points, and will tell what days these will be open. Local ration boards are cautioning all ration book holders to secure their new book during those specific days, as no further distribution will take place until after September 30. In the meantime the "latecomers," those who failed to get their books during the days set aside, will be without ration coupons during the intervening two weeks.

The services of volunteer workers are being enlisted by ration boards throughout the region to assist in the distribution of the new book. All ration book holders are being advised that they must bring their old ration books with them when applying for a new one. Likewise the green card marked RB191 in the old ration book is to be filled in by each holder and presented intact in the book when applying for the new book.

"All information on this card should be printed in pen and ink," a Prices Board official pointed out.

THEATRE NOTES

"Because of Him"

Film star Charles Laughton, who cares nothing for fishing, fondles one of the best collections of trout fishing equipment in the country in "Because of Him," new Universal comedy drama at the Orpheum theatre, Blairmore, Saturday and Monday.

The studio borrowed the equipment from Peewee Emerit, professional fisherman and holder of many national casting championships. It is valued at nearly \$2,500, and includes a gold-plated casting rod and gold-plated fly hooks.

Laughton portrays a famous actor and enthusiastic angler in the picture in which he is co-starred with Deanna Durbin and Franchot Tone.

"To Each His Own"

Coleman Saturday and Monday Preview in Bellevue Sunday September 1, 12.25.

Olivia DeHavilland, currently starring in Paramount's great love story, "To Each His Own," is going on a long journey soon, but she doesn't know where.

The star had her horoscope read recently, and it seems she's departing on a 9,000 mile trip "which will give you great happiness." The thought of being happy about such a long trip is inconceivable to Olivia, for, at the moment, she's of the mind that there's no place like home. Miss DeHavilland has had a full share of travel within recent months, having just concluded a U.S.O. tour during which she visited the troops in the Aleutians

and the South Pacific.

Miss DeHavilland typical of theatre folks, is superstitious. She's positive horoscopes don't lie, so she's already got her suitcases waiting in a handy location to begin packing.

"San Antonio"

Bellevue Saturday and Monday Preview in Coleman Sunday, September 1, 12.25.

A boisterous and colorful screen toast to the courageous men and women of early Texas, who risked mayhem and fought range wars to bring the longhorned steers across dangerous cattle trails to Abilene and the East, is Warner's impressive new technicolor production, "San Antonio," currently starring Errol Flynn as Clay Hardin, an embittered cowman determined to drive the lawless robber barons from the free range of Texas and co-starring Alexis Smith as Jeanne Starr, the glittering star of San Antonio's notorious Bella Union music hall, the film is an artful blend of fast-moving adventure, topnotch performances and breathtaking scenery, recounting the turbulent saga of the great Breakup of '77—when lawless hordes ravaged the cow country, decimating the great herds and ruining the men who owned them. An excellent supporting cast featuring S. Z. "Cuddles" Sakall, John Littel, Victor Francen and Paul Kelly. Directed by David Butler and produced by Robert Buckner, "San Antonio" is a rewarding evening's entertainment for young and old alike and a worthy successor to such past Warner hits as "Dodge City," "Sante Fe Trail" and "Virginia City."

Teen Town Notes

(Millie Bublinsk)

It sounds like the ball game on Sunday didn't do Chris much good because she's got an awfully sore throat. Oh boy! now she can't argue.

About 19 Coleman youths climbed Window Mountain last week and found the climb long and tedious but they liked it.

It certainly is good to see Ella, Joanna and the rest of the old gang back in town after a vacation spent "working."

Marge is wearing a ring that doesn't belong to her—Peter isn't wearing a ring that belongs to him. Add two and two together and what do you get? This is one time it won't be four.

As one "bright" clerk said the other day, "Well, Ella's back, Marge is back, and so is Joanne but what about my poor back—it's unburned."

Mary H. is feeling pretty proud of herself because she's going to be some unfortunate infant's God-mother.

Johnny L. won a package of cigarettes on a friendly bet on a ball game, but he's having a harder time getting the eggs than the players had winning the game.

Julius B's favorite saying is "I'll give you fifteen consecutive blows to the eye, each one twice the velocity of its predecessor."

Toby, Martha, Alex. and Marge were out enjoying the fresh air on Sunday night. Too bad they don't all live in the same part of town. No wonder it's raining so much lately. There are too many showers in town.

Let it rain. Joe Waveran is feeling very proud because his five month old pullet laid a triple-yolked egg.

T.B. QUESTIONS
ANSWERED BY THE
ALBERTA TUBERCULOSIS
ASSOCIATION
EDITED BY F. H. HEISE, M.D.
National Tuberculosis Assn.

Q. How often should a patient, taking treatment for tuberculosis of the lung at home, be examined by a doctor?

A. A consultation should be held with the physician at least once a month, and X-rays should be taken every three months at least, during the stages of active treatment. If the condition is acute, consultations should be more frequent.

Q. Should one go to bed when fever is present?

A. Yes. By resting, the body has a better chance of overcoming the fever, and there is less absorption of poison and a lessened heart beat and respiration.

Q. Is there no means whereby pleurisy may be checked?

A. Some forms of pleurisy seem to be resistant to ordinary treatment. However, many of them are benefited by ultra-violet ray, medications, physical agents, etc.

WORLD HAPPENINGS
BRIEFLY TOLD

George Foster, 52, theatrical agent who gave Harry Lather his start, died recently in London.

The Lincoln copy of Magna Carta has been installed in a one-ton safe fitted to a concrete block in Lincoln cathedral.

The South Wales and Monmouthshire Industries association will sponsor a big industrial show in London in August and September, 1947.

During the first six months of the year lifeboats in Britain were launched 266 times to help vessels and aircraft in distress and saved 381 lives.

Sir Evelyn Baring, high commissioner for Britain in South Africa, said the war office had asked for 10,000 natives for garrison duties in the Middle East.

Britain and United States will continue their wartime arrangements for the exchange of general economic information, the commerce department announced.

The south coast seaside resort of Bognor Regis, England, plans to abolish queuing for elderly people who live alone by providing voluntary helpers to shop for them.

Britain's newest battleship, the 42,300-ton Vanguard, has gone into dockyard hands at Portsmouth for an estimated six months' fitting out for next year's royal trip to South Africa.

A Free Port

No Port Must Be Subsidized Without Year Around Service

(By Jack Brayley, C.P. Staff Writer)
Just how that magic key to freer commerce—the free port—applies to Canada's ocean gateways in these days of growing exports and a general disposition to knock down world trade barriers is not widely apparent.

But some ports—notably Quebec, Halifax and Saint John, N.E.—have gone on record as supporting the idea. Others, such as Montreal, Vancouver and Victoria have expressed a keen interest and, transport Minister Chevrier announced in the Commons the other day that an inter-departmental committee headed by Emile St. Laurent, vice-chairman of the National Harbor Boards, is studying the matter.

Meanwhile, Quebec has taken the lead in the agitation and is showering parliamentary and trade boards throughout the province urging establishment of a free zone near the old citadel.

While not so vocal, Halifax and Saint John also have made bids, the two Maritime ports, for coming out of their year-round open ports—an argument which would rule out Quebec harbor, closed during winter months.

Gordon Innes, Liberal member for Halifax, who has been following the question closely for two years, has emphasized this point. He said:

"If we are to have legislation on this matter it must apply to all ports of Canada. No port must be subsidized which cannot provide the facilities for continuous year-round service. If certain ports were used as free ports and were not open all the year it might mean that goods would be landed in American ports and brought in bond to designated Canadian free port zones and this certainly would not be desirable with free-trade ports available."

A free port, in short, is an enclave in a protected country in which the freedom from customs restrictions allowed is valid only as long as the goods concerned are in storage there, or are moving into foreign and not into home markets.

Free ports now are in operation in New York and New Orleans in the United States where there are no comparable regulations to the Canadian bonded warehouse system which has been described as a "junior free port."

Probably the best example of the free port at its peak was Britain. In the days of free trade the whole island was a free port and the nation did an important business in trans-shipment and manufacturing for other countries.

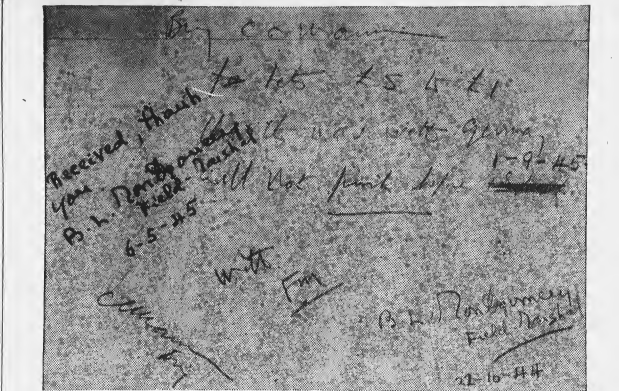

Before the war, Hamburg, Germany, had 150 firms employing 25,000 workers in its free port zone.

APPREHEND JAPANESE

TOKYO.—Allied headquarters ordered the Japanese government to apprehend Japanese Nationals filtering into Hokkaido from Sakhalin and the Kurile Islands. The public relations office explained that the apprehension was ordered "to guard against introduction of communicable diseases."

PROVED TAXABLE

Michael Faraday, who invented electric-magnetism, was asked by Gladstone of what use it would be. "Some day, Mr. Chancellor, you will be able to tax it," came the reply. Faraday predicted right, and the evidence is one item on every electric light bill, says the St. Catharines Standard.

MONTY MUST HAVE KNOWN SOMETHING—BATTLE or BETS. "Monty" just couldn't lose. He won 55 from Maj-Gen. Churchill C. Mann, C.B.E., D.S.O., Vice-Chief of Staff, Canadian Army, when the latter was Chief of Staff of the First Canadian Army in Western Europe, according to the current issue of Mayfair Magazine. Proof is the filing card reproduced above. Maj-Gen. Mann's handwriting is as follows: "Brig. C. C. Mann bets 55 to 1 that the war with Germany will not finish before 1-9-45." The wager is acknowledged in the lower corners by the signatures of Brig. Mann, and Field Marshal Montgomery, and the date 22-10-44. At the left, centre, is the inscription "Received, thank you. B. L. Montgomery, Field Marshal. G-5-45."

Soft Drinks

Large Increase In Consumption Shown In Recent Years

Canadians have taken to the pop bottle in a big way. By the end of the year it is estimated they will have consumed sufficient soft drinks to float an ocean liner almost four times the size of the Queen Mary.

Quoting government statistics, a Montreal beverage manufacturer claimed in an interview at Montreal that there was an increase of 86 per cent. in the consumption of carbonated drinks in Canada between 1935 and 1941. "Because of the sugar rationing, the 1942 consumption dropped somewhat. Nevertheless, figures for that year show 58,273,974 gallons of pop valued at \$36,646,385 were sucked through straws by thirty Canadians—a volume almost four times the displacement of the Queen Mary."

To determine the fundamental reason for the increasing popularity of soft drinks, one must go back to the ancient days of European history when the first mineral spring became a meeting place for the ailing. As additional springs were discovered hundreds of lavish health resorts, or spas, were established, many being famous to this day. In the United States some 10,000 such springs have been located. Several are known in Canada.

Fantastic claims regarding the curative qualities of their waters were made by spa promoters. Some guaranteed complete cures for ulcers, dysentery, gout and rheumatism. At other resorts it was claimed one could get rid of jaundice, neuralgia, diabetes and gonorrhea, on the continent there was a special spa to cure every known disease.

In the eighteenth century chemists undertook to analyse mineral water. They discovered one of the four liquids was merely a solution of ordinary water and carbon dioxide. In 1772 Joseph Priestley, famous British chemist and physicist, devised a method of making mineral water in a laboratory by aerating water with carbon dioxide by compression. Eighteen years later the manufacture of carbonated water was launched in Geneva, Switzerland. Soon it was being made in England.

In the United States, in 1807, Dr. Philip Physick induced a chemist to prepare a carbonated drink mixed with fruit juices as a medicine for some of his patients. This was the birth of the soft drink industry in North America. Soda fountains sprang up in numerous American cities and immediately proved popular. People still considered charged water in terms of medicine rather than refreshment, which is probably why soda fountains are found in most drug stores today.

The first soft drink bottle was cylindrical in shape with a rubber gasket at the top of the neck and a glass marble inside. When the vessel was filled with carbonated water the pressure of the gas from the inside forced the glass ball against the gasket and sealed the contents.

The original opener was a wooden plug with a disc top. To open the bottle the plug was inserted in the neck and struck with the fist. The sudden escape of gas resulted in a distinct "pop," which is how the name of "pop bottle" originated. The present type of bottle cap, or "crown" as the trade knows it, came into use in 1880.

COMING TO CANADA

LONDON.—The first of 4,000 Polish army veterans who are going to Canada as agricultural workers are expected to reach the Dominion in mid-September, it has been learned. The Poles will be taken from Italy direct to Canada under two-year agricultural contracts.

KILLED MANY WORKERS

Phosphorus, once the principal ingredient of match heads, killed and maimed workers in the industry by causing necrosis, a deadly disease, until a non-poisonous match was invented.

Goat Story

Animal From The Zoo Jumps Into A Lion's Den

Apparently exhilarated by the warm, unseasonable winter weather on the Transvaal highveld, one of the mountain goats at the Johannesburg Zoo recently leaped over the wall of the goat enclosure with a great running jump and landed—in the lion enclosure.

Recovering from his first surprise, Satan, a magnificent specimen of manesless lion, began to stalk the goat. But Satan, like others in captivity at Johannesburg, had long been fed on meat which he didn't have to hunt. He had lost much of his native cunning and agility.

The goat was too quick for Satan, and keepers quickly arrived to see that the chase did not continue too long.

The keeper of the lions shouted, "Get inside, Satan!" and humbly the king of beasts abdicated and entered his cage.

The unwary goat, dashing about in panic, fell from the perpendicular rock face separating the lions from the public. Injured, the goat was carried back to his own quarters, while Satan, allowed out again from his cage, lashed his tail in chagrin.

SYMBOL OF LIBERTY

MARGATE, Kent, England.—Margate City Council received from a citizen a request that it launch a national campaign to erect a giant statue of Winston Churchill on the white cliffs of Dover as a symbol of British liberty. H. A. Marsh proposed that the statue show Churchill holding his famous cigar, the tip of which would be "illuminated day and night for all time, to be seen by ships in the Channel."

ASTRONOMER RETIRES

OTTAWA.—R. McMillan Stewart, director of the Dominion Observatory here who holds the title of Dominion astronomer, retired after 44 years in government service. He was appointed to the position in 1924.

LIFE'S LIKE THAT

"I don't suppose you dare give me just a tiny hint where I might find him."

Carrier Pigeon

Has Been Away Through No Fault Of Its Own

Carrier pigeon No. 656, like Pig No. 311 of the atomic bomb explosion at Bikini Island, has been A. W. L. but through no fault of its own.

No. 656 was a casualty. Apparently freed on a flight the bird was somehow injured and was found on the shores of the Ottawa river near the canal locks.

Believed to belong to the armed services, the carrier pigeon, which has a red rubber band on its left leg for carrying messages, was seen by three young Ottawa youths trying to fly near the river bank.

The youngsters, Norman St. Germain, 310 Gladstone avenue; Michael Malone, 384 Frank street, and Gilbert Davis, 437 Kent street, brought the bird into the Evening Citizen office, and later took it to the Ottawa Humane Society.

The bird carried a 1946 band on the left leg with the number 656. Until the bird is taken back to its left it is still classed, according to service procedure, as "Absent Without Leave."—Ottawa Citizen.

BORSTAL PLAN

VICTORIA.—Arrangements for the re-establishment of the Borstal system of rehabilitation of young delinquents in British Columbia will go ahead immediately without waiting for another session of the legislature provided there are no physical obstacles in the way, Attorney-General Gordon S. Wisner said here. Reopening of the institution that functioned in Vancouver from 1937 to 1942 hinges mainly on available accommodation.

LESS JUVENILE CRIME

Juvenile delinquency, which reached an all-time high in 1942, is on the wane, with the number of juvenile convictions in 1945 the lowest since 1940, the Dominion Bureau of Statistics reported. Juveniles brought before the courts in Canada in 1945 numbered 9,735, compared with 11,554 in 1944.

REG'LAR FELLERS—Doggone!

Unmanned Planes

Following Description Gives Idea Of How Drones Are Operated

The recent historic flight to two unmanned B-17 Drones from Hilo, Hawaii, to Muroc air base, Calif., was termed the forerunner of accurate, long range-guided missiles armed with atomic warheads.

Brig-Gen. William L. Richardson, chief of the United States Army Air Force guided missiles division, said the unprecedented radio-piloted flight proved the air force could have struck a target at 2,500 or more miles range with any conventional bomber—unmanned.

How is a pilot drone operated? By automatic pilot and by electronics (radar, the radio if you prefer) from a mother airplane flying as close as 200 feet or at extreme radar "vision," at present a theoretical 100 miles.

Special radar panels—exact duplicates—are set up in each plane. The operator, or "beeper," in the mother craft has a television picture of the drone's operations board. The panel is pictured as clearly on the small screen as if it were an actual photograph.

The beeper can see instantly the drone's gauges—altitude, speed, manifold pressure, compass, R.P.M. (revolutions per minute) and fuel supply. The picture also carries the drone number, so that if more than one "babe" is involved, the "beeper" knows which craft's panel is pictured.

The drone is launched by a ground control crew, operating with radar equipment set up on two jeeps. As soon as it is airborne, control is taken over by the mother, which quickly puts it on the automatic pilot. Speed, altitude or other operational changes are effected by the beeper by electronics.

For landings, the mother directs the drone's approach in a normal landing circle. It drops the drone to 800 feet altitude, slows it to 135 miles an hour speed and turns it over to the ground control crew for the actual landing when the drone is a little less than a mile from the runway.

The drone is braked to a normal stop by electronics control by the ground crew. Barring mishap, the drone lands as smoothly as a pilot craft.

A mother can control as many drones in flight as she can carry in individual operations panels.

Where Milk Is Dear

Price In United States Much Higher Than In Canada

In a list comparing prices in Canada with those in the United States, it was stated that milk cost only 13 cents a quart in Toronto, as against 18 to 19 cents a quart in Buffalo. As the Times-Review of Port Erie points out, the difference is greater than that. The Canadian imperial quart is 40 fluid ounces, while the U.S. quart is only 32. So the minimum price of milk in Buffalo, on the basis of imperial measure, is actually 22½ cents a quart.

Sound Advice

Public Is Urged To Save Money For Future Use

The Bank of Montreal is putting across Canada a series of advertisements, directly addressed to the average individual earner. "Save yourself and you save Canada" is the substance of the timely admonition, which is stressed on five counts:

Hold on to your Victory Bonds. Buy only those goods which are in fair supply and save your money for the day when goods now in short supply will be really available.

Avoid black market purchases. Keep up your insurance.

Build up your savings account. "Save yourself and you save Canada" is not the counsel of despair.

Nor is it one of futility. It is far better to have such advice now effective than to envisage the time when someone will cry out "Save you, you!" everybody for himself.

The Bank of Montreal counsels thrift, frugality and a little care and foresight. Such counsel can never be out of date or obsolete. The uncertainties which may lie ahead will cause no fear for those who take the advice seriously.—St. Catharines Standard.

Talking Dog

Only Canine In The World Who Can Speak A Sentence

LONDON—In the middle of the "dog days" the Daily Mirror sprang a talking dog on its readers which, the paper said, has been found to be the world's only canine who can articulate human speech.

The Mirror told how two well known British veterinary surgeons had examined the phenomenon and had found that "Ben," boarded in Royston, near Cambridge, could say: "I want one."

Just what "Ben" wanted remained obscure, although the dog performed his trick with particular success in a tavern, the Mirror said. Now, the veterinarians were said to advise that "Ben" should be taught to say "I want more."

For Reducing Diets

OUR COMPLETE SHORT STORY—

YOU KNOW BILL

— By —
MATTHEW F. CHRISTOPHER

Copyright
Wheeler Newspaper Syndicate

SHE heard the moan as she carried the empty glass out of the ward, and she knew it was the new boy in the corner. The one with the white bandages over his eyes. She saw the pain that grooved his forehead.

Suddenly she turned and went back into the ward. She stopped beside his bed, and her "Hello!" was gentle, almost inaudible. "The doctor told me you'll be able to play baseball . . . or football. You can't focus with one eye. You can't do lots of things. And people would stare at your back. There goes Joe Watson. Did you see his comelief eye. I'd rather be—" His voice trailed off.

She sat down on the edge of the bed, and touched his arm above the elbow, resting her fingers lightly, with just enough pressure so he could understand because he was so young. Nineteen, Nurse West had said.

"You don't want to give up," she said. "It wasn't a routine. It sounded almost the same, but it wasn't. With each one it was different."

"Remember, there are some who lost both their eyes."

"I'm not them," he said. And they don't like it. None of 'em like it."

"No, they don't," she agreed. "But they learn to take it, without giving up. They learn to live with their minds and their bodies and forget they ever had sight, and they're happy. But you'll be different. You will still be able to see."

"Please," he begged. Don't start giving me that again. I've heard it over and over. I'm sick—"

"I'm sorry," she said.

"I suppose that you don't care living in a cottage—or do you? I mean near a lake, with the noises of birds and the rustle of leaves to keep you company?"

She could feel him gazing at her from the corners of his hidden eyes. His mouth, a curved wound in his tanned face, parted.

"I'm sorry," she sighed. "I guess you don't care for the outdoor sort of life." She felt unhappy, and she turned away momentarily, staring at her fingernails.

"Well . . . never went fishing. Or hunting. Never . . ."

"But I did," he said quickly. "I always fished. I loved it. And I loved hunting—" His voice caught.

"Oh, you did? How wonderful! I did, too. I used to go fishing with my brother. Did you ever fish for pickerel?"

"Pickerel? Sure, we used to go down to Perry Lake. Jim and I. Jim was a pal of mine, a great fisherman. We used to see who'd get the biggest. Boy! Pickerel! There was a lot of 'em in Perry Lake. But what I was crazy about was spearing for suckers. Did you ever spear for suckers?"

"Twice," she said. "But I don't care for it. I got on the hooks once and got soaked." "Oh, that's because you're a woman. Spearin' suckers is fun, more fun than fishing. I got 83 one morning. I'll never forget it. Boy!" A smile brightened his face, showing his white teeth.

"Will you . . . let me touch your hand?" he said. She smiled. She gave him her hand. He squeezed it. "You're swell," he said. "I can talk to you—all day." "I'll be seeing you again—soon," she said.

Nurse West met him in the corridor. "Carol," she said. "The doctors were telling me about Bill. Bill Delaney. Carol's forehead puckered in frown. "You know him?" Nurse West said. "The boy you were talking to yesterday, and the day before, and the day before that?"

"They say he's completely past the critical stage. They had almost given up hope for him. You must be a saint, darling." Carol laughed. "I'm so glad. He's a nice boy. I'll go and see him."

Bill was lying with his head band on his hands when she came in. His eyes smiled warmly. "Hello," he said. "Hello. I heard you were better."

"Lots," he said. She could see it, too.

"I was thinking," he said, rolling over onto one elbow. "You know that chicken farm idea we were talking about? You sure worked me up about it. I'm going to take it home with me when I get out here. His expression changed slightly. "I . . . I'm sorry," he said. "I guess I didn't tell you I got a girl back home. I . . . should have."

Her hand touched his. Her eyes became mist-filled. "That's all right," she murmured. "I hope you make out well with that farm."

Nurse West had come into the room. They walked out together. "Carol," Nurse West began, "these miracles you—"

"They aren't miracles, Miss West," Carol interrupted. "It's just making them believe they have something

to live for. When they come here they forget everything but their wounds. They left their real lives behind them. I . . . I just bring it back to them."

Nurse West grinned. "Well, what I meant to say is aren't you being unfair to yourself? He has another girl."

Carol smiled. "No, Miss West, that's where you're wrong. Really, the expense is always theirs. You see, I have another fellow, too. I always have another fellow."

Precious Cargo

Cosmic Rays Believed To Be Potent Source Of Energy

Bearing a precious cargo of cosmic ray records, the specially equipped B-29 bomber which spearheaded science's latest attack on one of Nature's great riddles was flying to Washington.

The Superfort "Flying Laboratory," after a three months' pursuit of the strange cosmic messengers, which constantly bombard the earth from outer space, possibly held the key to many unsolved secrets of the universe.

Fitted with special instruments for measuring the intensity of the invisible radiations and recording their impact, the high-flying bomber ranged back and forth over a 4,800-mile path at heights up to approximately 6½ miles above sea level.

The area of research stretched from near the Canadian border to a spot off the coast of northern Chile. The little-understood cosmic rays from some secret source in space are the most penetrating form of radiation. They pass through the human body 20 to 30 times a second. They have penetrated lead blocks 75 feet thick. If man could harness their power he might have an endless source of titanic energy.

Likes Her Job

Woman Cobbler In Vancouver Would Not Do Anything Else

VANCOUVER. Pretty Frances Chambers is a skilful cobbler and cannot understand why anyone should consider shoe-making an unusual occupation for women.

"I wouldn't change with any stenographer," she told an interviewer. "I like cobbling because it requires more talent than other occupations open to women and it enables me to meet so many people."

Mrs. Chambers started in the trade seven years ago and liked the work so well that she learned every phase of the craft. She said that she had never gouged her finger with an awl and has come to enjoy the acid odor of hot rubber.

Her husband, whom she said she "almost married over a mended boot," is also a cobbler.

Japanese Atrocities

Canada Securing Evidence To Assist In Prosecution

The R.C.A.F. has reported on the work of the Canadian war crimes liaison detachment which has been engaged for months tracing information on atrocities committed in Japanese prisoners of war camps against Canadians.

A press release said the unit, under command of Lt.-Col. Oscar Off of Vancouver and including three other officers, has been sifting evidence and comparing findings with those of Britain and the United States—evidence and findings which may eventually appear in war crimes courts at strategic points in the vast Pacific.

As Canada now has no armed force in the Far East, it will be necessary to try Japanese accused of crimes against Canadians in either British or American courts. Both governments have informed Canada they are willing to try such criminals and have invited the detachment to assist in the prosecution.

In Ottawa the Canadian war crimes investigation section at defence headquarters, under Lt.-Col. M. J. Griffin of Vancouver, sorts evidence and adds the written testimony of former prisoners now back home in Canada.

One of the unit's most important pieces of evidence is the diary kept by Wing Cmdr. Leonard J. Birchall, O.B.E., D.F.C., of St. Catharines, the "Savior of Ceylon," who warned the British colony of the approach of a Japanese invasion fleet and then was shot down and taken prisoner.

The diary contains the history of every prisoner Birchall met and his testimony is valued by each country whose nationals were prisoners of the Japanese. Only one-half of the diary, made up of several flimsy paper books and kept hidden in a false-backed book, remains. The other half was lost in a bombardment on an American fleet.

The difficulties of the unit are many. There is ambiguity in evidence and the complexity of Japanese spelling make identification difficult. Long distances have to be travelled to obtain testimony and a check of evidence requires that affidavits be obtained from all parts of the world.

Made A Difference

Comma Dropped When Gray's Elegy Was Printed Changed Meaning

It is strange that Thomas Gray's solemn Elegy written in a Country Churchyard should begin with the jingling line:

The curfew tolls the knell of parting day.

As a matter of fact most of us may recall occasions when we or others have jingled through it, quite satirically. But that important opening line of the great elegy would through 200 years if an anonymous proofreader in 1750 had not missed the comma which appeared in Gray's copy and which was subsequently dropped in the process of printing. If one re-reads the line with the comma in its proper place, one sees at once the literary injustice inflicted by the casual and distant error.

The curfew tolls, the knell tolls parting day.

The significant pause banishes the jingling metre and restores the impressive solemnity at the poem's outset.—Montreal Gazette.

Car Production

Industry Is Seriously Hampered By Lack Of Parts

DETROIT.—Full volume passenger car production still is beyond the automobile industry's horizon, according to most of the authoritative surveys.

The industry, its spokesmen assert, is hampered by interruptions to its flow of parts, equipment and raw materials. The car makers attribute these interruptions to strikes in supplier plants; representatives of the United Automobile Workers (UAW) industry charge that manufacturers are hoarding certain types of supplies against their competitors, unbalancing the over-all supply of car components.

Whatever the cause of the production lag industry has turned out about 1,500,000 fewer passenger cars than it hoped to assemble up to this time.

At the age of 11, Goethe wrote a novel in seven languages.

Cattle Shipments

Exports From Canada During Last Year Were Heavy

More than 71,000 head of purebred dairy cattle, having an aggregate value of \$1,612,955, were exported by Canada to foreign countries during 1945, the Department of Trade and Commerce has announced.

Of these 24,071, valued at \$5,161,391, were classed as purebred cattle, while 47,304, valued at \$6,451,594, were dairy cattle.

An additional 9,801 purebred cattle and 24,847 dairy cattle were exported during the first five months of the current calendar year.

These figures indicate the rapidity with which Canada has risen to prominence as a producer of breeding stock in 1950 only 3,017 purebred cattle valued at \$602,689 were exported. Shipments of dairy cattle to other countries fifteen years ago totalled only 9,257, valued at \$890,687.

A total of 3,470 purebred sheep, valued at \$93,143 were also exported in 1945 as were 852 purebred swine, valued at \$33,520; 26,650 purebred poultry, valued at \$61,879; and 848,880 baby chicks, valued at \$115,218.

Canadian Foundation

Is To Be Established For The Advancement Of Pharmacy

The Canadian Conference of Pharmaceutical Facilities meeting in Toronto in conjunction with the annual council meeting of the Canadian Pharmaceutical Association, announced the establishment of a Canadian foundation for the advancement of pharmacy which will provide funds for student scholarships, fellowships for graduate students in pharmacy and refreshment courses for graduate druggists.

The foundation, headed by J. R. Kennedy of Toronto, was established by drug manufacturers, distributors and retailers throughout Canada.

SELECTED RECIPES

LEISURELY WEEK-ENDS

Are you a slave to week-ends? Do you stay in the kitchen while your husband and the children are off to the golf course, the playground or on a hike? Careful planning can put you on a five-day working week.

A Saturday night standby, baked beans, fills the bill for a quick and easy meal. Serve them with bran brooder bread and a green salad, and you have a nourishing meal ready for the table in practically no time at all.

Two meals on Sunday can easily do duty for three on week days. If the members of your family are late risers they probably will be clamoring for a substantial breakfast. Make it "brunch" and forget about lunch on altogether. Try these menus as a starter on the road to happy week-endings.

UPSIDE-DOWN HAM LOAF*
2 lbs. ground smoked raw ham
2 eggs
1 cup milk
1/2 teaspoon salt
2 tbsp. chopped green pepper
4 cups corn flakes
1/2 cup brown sugar
1 teaspoon whole cloves

Combine meat with eggs, milk, salt, green pepper, mix well. Add coarsely crushed corn flakes and mix thoroughly. Sprinkle brown sugar in bottom of loaf pan. Sprinkle with cloves. Add meat mixture. Bake in moderate oven (350 deg. F.) about 1½ hours. Unfold and turn upside-down on heated platter.

Yield: 12 servings.

The planet Pluto swings out as far as 4.5 billion miles from the sun and its maximum distance from the earth is 4.4 billion miles.

SENATOR TO SAVE MINNE-HA-HA'S SKIN

Opposition of a society for the preservation of the cigar store Indian in Maryland is planned by Senator George L. Radcliffe, who poses with a wooden statue of Minne-Ha-Ha, now stored in the Maryland Historical society's museum at Baltimore.

Natural Resources

Of Ontario Said To Be Retarded By Lack Of Population

TORONTO.—Development of Ontario's vast natural resources is retarded only by lack of population, provincial agriculture minister Kennedy said at a dinner given by the government for the international emergency good council committee on fertilizers. The committee represents 11 nations.

"Our population is only 11 persons to the square mile and the land under cultivation amounts to only 25 per cent of the province's area," said Mr. Kennedy. "What we need here is more people."

More than a score of pulp and paper companies in Northern Ontario were in constant operation but they had only scratched the fringe of millions of acres of standing timber.

"One company (Abitibi) is working in a circle which will take it 20 years to complete and by that time there will be new growth ready for cutting," said Mr. Kennedy. "I've flown over areas which I doubt will ever see the imprint of man for years to come."

TROOPS OVERSEAS
More than 8,400 army, navy and air force personnel are still overseas awaiting repatriation to Canada. It was learned from service headquarters. A total of 8,700 soldiers, 700 airmen comprise the group. Number of naval personnel overseas will not be known until enlistments in the new interim force are complete.

Game Regulations

The Honorable J. Allison Glen, minister of mines and resources, Ottawa, has just issued the regulations regarding Migratory Birds for the current year.

A summary of the regulations as they apply to Alberta follows:

OPEN SEASONS Both Dates Inclusive

WILSON'S SNIPES

Throughout the Province from one-half hour before sunrise September 14 to one-half hour after sunset November 9.

DUCKS, GEESE (other than Ross's Goose) RAILS, COOTS

In that part of Alberta lying north of the right bank of the Athabasca River going down stream to its intersection with the north boundary of Township 72 and north of the north boundary of Township 72 from Athabasca River to its intersection with the interprovincial boundary between Alberta and Saskatchewan: From one-half hour before sunrise September 7 to one-half hour after sunset November 21.

Throughout the remainder of the Province of Alberta: From one-half hour before sunrise September 14 to one-half hour after sunset November 28.

There is close season throughout the year on Eider Ducks, Wood Ducks, Swans, Ross's Goose, Cranes, all shore birds except Wilson's Snipe, and all migratory non-game and insectivorous birds.

Migratory game birds killed during the open season may be possessed in Alberta at any time, but the onus of proof that birds possessed were lawfully killed shall be on the person having the birds in possession.

BAG LIMITS

In any day: Ducks, 15; of which not more than 8 shall be species other than Mallards; Geese, 5; Coots and Rails, 25; Wilson's Snipe, 5.

In any open season: Ducks, 150; Geese, 25; Rails and Coots, 100; Wilson's Snipe, 100.

No one shall have in his possession at any time more than 60 Ducks.

GUNS, APPLIANCES AND HUNTING METHODS

FORBIDDEN—The use of an automatic (auto-loading) gun, or swivel or machine gun, or battery, or rifle, or shotgun loaded with a single bullet, or any gun larger than number 10 gauge, or any weapon other than a gun or a bow and arrow; and the use of live birds as decoys, or of any aeroplane, power-boat, sail boat, or night-light, and shooting from any motor or wheeled vehicle, or a vehicle to which a draught animal is attached. The hunting of migratory game birds by the use or aid of baiting with grain or other artificial food is prohibited.

The shooting of migratory game birds earlier than one-half hour before sunrise or later than one-half hour after sunset is prohibited.

The penalty for violation of the migratory bird laws is a fine of not more than three hundred dollars and not less than ten dollars, or imprisonment for a term not exceeding six months, or both fine and imprisonment.
